

QUICK START GUIDE: SPECIAL MEASUREMENTS

What Are Special Measurements?

Many items in FedMall are available in a single configuration that doesn't vary with the owner: think of a box of blue pens, for example. On the other hand, clothing items typically come in various sizes, and depending on the item they may be uniquely tailored to the wearer. As a result, when you are ordering certain clothing items, you will be given an opportunity to specify special measurements to ensure the best fit.

Choosing Special Measurement Options

When you search or browse for a clothing item, you will see its product detail page:

Depending on the item, you will have several options:

- Select a **predefined size**
- Purchase **For Stock**
- Purchase **For Individual**

You will make this choice based on the "NSN Size" drop-down list.

Predefined size items

A predefined size item comes in a set of standard sizes. The NSN Size drop-down list will offer several predefined sizes. Selecting one will update the NSN displayed and the price of the item.

WHERE DO THESE ITEMS COME FROM?

For those catalog items that need to capture special measurements, FedMall receives these items from the DLA Troop Support Clothing and Textile (C&T) Database. These items are all National Stock Numbered items (NSNs) or Local Stock Numbered items (LSNs), not commercial items. Depending upon your selections, you may see a different NSN or LSN for the same type of clothing item when you place your order.

HOW IS THIS DIFFERENT IN FEDMALL?

In its initial release, FedMall will focus on presenting all of the available options to users who are ordering special measurement items. You can use this quick start guide to help you identify which measurements apply to your item, so that you can be sure that you are capturing the information necessary to successfully complete your order.

WHAT IS FEDMALL? HOW DO I ACCESS IT?
